

JAYADHAN S

Automation Test Engineer

+91 8056335223 | jayadhan26@gmail.com | [LinkedIn: Jayadhan s](#) | [GitHub: jayadhan26](#) | Erode, TN

SUMMARY

B.Tech graduate with strong foundations in Software Testing, Java and SQL. Experienced in designing test cases, executing functional and regression tests, validating data using SQL queries, and tracking defects throughout the testing lifecycle. Familiar with Selenium WebDriver, TestNG, and Maven with a good understanding of SDLC, STLC, Agile, and defect management processes. Eager to grow as an Automation Test Engineer and contribute to delivering high-quality software solutions.

TECHNICAL SKILLS

Automation Tools: Selenium WebDriver, TestNG, Maven, JUnit

Frameworks: Page Object Model (POM), Data-Driven Testing

Programming: Java (OOP, Collections, Exception Handling), Python Basics

Manual Testing: Test Case Design, STLC, SDLC, Bug Lifecycle, Functional, Regression, Black-Box Testing, BVA, Equivalence Partitioning

SQL & Databases: MySQL, DDL, DML, TCL, Joins, Subqueries, Stored Procedures, Indexing, Data Validation

CI/CD & Tools: Git, GitHub, Jenkins (Basic), Jira, Postman (Basic)

Reporting: Extent Reports, TestNG HTML Reports, Excel-based Test Reports

Other Tools: Power BI, Tableau

PROJECTS

Selenium Automation Framework | Mar 2026 – Jun 2026

Technologies: Java, Selenium WebDriver, Maven, Git, GitHub

- Developed automation scripts using Selenium WebDriver and Java.
- Implemented test scenarios covering browser navigation, dropdown handling, mouse actions, synchronization, screenshots, and webpage validations.
- Managed project dependencies using Maven.
- Maintained source code using Git and GitHub version control.

SQL-Based Data Validation & Reporting | Jan 2025 – Mar 2025

Tools & Tech: MySQL, Excel, Power BI

- Wrote SQL queries using joins, subqueries, and aggregations to retrieve and validate data across relational tables.
- Performed basic data validation checks such as identifying NULL values, duplicate records and inconsistent entries.
- Created reports and dashboards using Power BI for visual analysis and reporting.

Facial Emotion Recognition | Feb 2025

Tools & Tech: Python, TensorFlow/Keras, OpenCV, CNN, FER2013

- Trained a CNN on the FER2013 dataset (35,000+ images) to classify 7 emotion categories with real-world variability.
- Applied data augmentation and dropout regularisation to improve generalisation on unseen facial images.

Breast Cancer Prediction | Apr 2024

Tools & Tech: Python, Scikit-learn, Random Forest, SQL

- Achieved 96% accuracy using Random Forest on the Wisconsin Breast Cancer dataset with StandardScaler and LabelEncoder preprocessing.
- Evaluated model using precision, recall, F1-score and confusion matrix to validate clinical reliability.

EDUCATION

B.Tech — Artificial Intelligence & Data Science | 2022 – 2026

Kongu Engineering College, Erode | CGPA: 7.38

Relevant Coursework: DBMS, Software Testing, OOP with Java.

CERTIFICATIONS

- SQL with SQLite | Udemy | 2026
- NCC 'C' Certificate — National Cadet Corps | 2025
- Business Analysis Basics — Simplilearn SkillUp | 2025
